HSM®

Style. Tranquility. Efficiency.

SECURIO – a totally new look for today's shredders.

Document shredders have become an integral part of modern offices. Therefore, it is only appropriate that SECURIO shredders are totally state-of-the-art in terms of their design, economic energy management, absolute ease of operation use and low-noise in operation. These combined features produced a document shredder for the future office today.

SECURIO – our credo for ease of use:

- > Simply select the different functions with a single control key: start, stop, temporary and permanent mode.
- > In the event of a paper jam, the reverse function starts automatically. Alternatively, you can press the "R" button if you wish to operate the reversing function yourself.
- > A transparent front window allows quick and easy site of container capacity and level.
- > A large waste container extends the interval between emptying to save time and money.
- > Separate waste bags for paper and CDs allow waste separation (SECURIO B32 model or higher).

EMCS (energy management and control system) – dealing with energy in a sensible manner.

- > Automatic shut-down function: The SECURIO automatically switches to energy-saving mode 2 minutes after use, i.e. all unnecessary electrical consumers are switched off or their consumption is reduced. If you now feed the shredder with paper, it will automatically switch on again.
- > Automatic switch-off: The SECURIO switches off completely if it is not used for 4 hours. As a result, no valuable energy is wasted at night or at the weekend. The SECURIO is immediately operational again at a press of the elegant control key.
- > Temporary mode: To shred small pieces of paper, credit cards or foils, press the control key for only 2 seconds – the SECURIO runs for 10 seconds and then automatically switches off again.
- > Permanent mode: For large quantities of paper and documents, the control key is pressed for 4 seconds and the SECURIO is activated for continuous operation. The machine automatically returns to the stand-by mode when the operation is completed.

Quiet operating sound.

Great emphasis was placed on attractive sound design during the development phase. The SECURIO shreds your documents with a pleasantly quiet operating sound.

SECURIO® B24

For installation directly by the desk.

- > For shredding not only paper and documents but also credit and store cards (security level 2 and 3) as well as CDs (security level 2)
- > Intake width: 240 mm
- > Choose from security level 2 strip cut or security level 3 or 4 particle cut machines
- > Removable container: 34 l
- > Height: 605 mm

At security level 2, the SECURIO B24 can also shred CDs with ease.

Folding safety element provides optimum protection for the operator.

Container handle of elegant design.

Tilting container for easy removal of the shredded material.

SECURIO B24

	Strips	Particles
Cutting size in mm	3.9 / 5.8	1.9 15 / 4.5 30

SECURIO® B32

Suitable for central use by several people within a department or small office.

- > For shredding not only paper and documents but also credit and store cards (security level 2 and 3) as well as CDs (security level 2)
- > Intake width: 310 mm (DIN A 3)
- > Choose from security level 2 strip cut or security level 3 or 4 particle cut machines
- > Container/collection volume: 82 l
- > Height: 793 mm

Special slot specifically for shredding electronic media.

The safety cover can be simply folded up in order to shred large amounts of paper.

The waste bag can be taken out easily through the large door.

The SECURIO is an elegant object due to its dynamic design.

SECURIO® B34

Central positioning in busy offices. Large volume, high performance.

- > For shredding not only paper and documents but also credit and store cards as well as CDs (security level 2 and 3)
- > Intake width: 310 mm (DIN A3)
- > Choose from security level 2 strip cut or security level 3 or 4 particle cut machines
- > Container/collection volume: 100 l
- > Height: 845 mm

At security level 2, the SECURIO B34 can shred CDs with ease.

Folding safety cover provides optimum protection for the operator.

Waste bag easy to remove through the large door.

Due to its large collection volume, the SECURIO B34 is suited for use by several persons.

New perspectives with established values.

Quality "Made in Germany" by HSM.

SECURIO is the next generation of the shredding machine. Up to date. Designed to meet your requirements. And based on the entire technical experience of a renowned manufacturer. The decisive factors for HSM products: quality, performance and durability – are also embodied in the SECURIO.

The guarantees.

- > Money-back guarantee or upgrade to a larger device within 14 days.
- > Replacement / repair guarantee: We immediately replace defective machines with new machines during the warranty period (2 years). They are then repaired by authorised specialist dealers or HSM's customer service, which may offer new machines at favourable conditions.
- > Plus guarantee: A 10-year guarantee on the 100 % steel cutting rollers (normal wear and inappropriate use excluded).

The cutting rollers.

The specially hardened 100 % steel cutting rollers are manufactured from a single piece of steel, will not be affected by wear and tear and ensure a permanently precise cut. In addition, staples and paper clips present no problems for SECURIO.

V-TEK by HSM
The V-TEK groove of the cutting rollers is a ground-breaking development of HSM in terms of shredding equipment. The extremely efficient and high-precision cutting mechanism of the V-TEK groove ensures a considerably higher cutting capacity at at equivalent energy consumption.

The drive.

The optimum design of all cutting unit components ensures smooth operation, saves valuable energy and reduces wear. All motors are designed for continuous operation.
