HIGH TECHNOLOGY SHREDDING SYSTEM

KOBRA CYCLONE The Cyclone System is the ultimate development in shredding technology available on the KOBRA Cyclone shredder. Blades rotating at a very high speed combined with the power of a turbine providing the unit with an airflow allow the shredding of up to 500 sheets of paper at a time as well as the shredding of many other types of materials into 5 different available particle sizes.

The turbine generates a high pressure airflow and by making the air stream spin, particles are subjected to centrifugal forces and deposited from the airflow into the disposal bag.

This unique shredding system delivers the highest shredding performance and efficiency along with maximum flexibility in choosing the correct Security and bulk reduction level for a given application.

* This brochure includes a dedicated section about the KOBRA CYCLONE shredder
