

NOVUS[®] PRO STAPLERS

B4FC FLAT CLINCH STAPLERS

Novus Pro Staplers can be found in the offices of professionals throughout the world. Developed in Germany, these high performance staplers are designed to improve productivity and efficiency at work. Whether you need to staple a few sheets of paper or a stack of 60 pages, Novus Pro Staplers will help you get the job done faster and with less effort.

The compact Novus Pro B4FC is a high performance executive stapler with steel driven mechanism. It features a dual staple guide system that provides superior performance and ensures each leg of the staple has even pressure until it clinches your documents. It's versatile Tri-Mode stapling capability produces either a permanent flat clinch which bends and presses the staple legs flat to provide 30% more binder storage, a temporary pin, or tack. The temporary pinning mode

allows you to easily remove the staple from the back of the document without any other device. This eliminates the need for paper clips or other temporary fasteners. The tacking mode is convenient for attaching documents to a wall or corked surface such as a bulletin board. Each mode is easily attained by rotating the circular anvil at the base of the stapler.

No more jammed fingers that often occur from spring activated, top loaders. The Novus Pro B4FC is a front loading machine that is easily refilled by pushing the red button at the back of the stapler.

For optimal performance, we recommend using Novus 24/6 Super and 24/8 Super staples. These thicker gauge, precision formed staples will ensure your Pro stapler performs as designed.
